

LOST

13 Sep. 2019 @ Old Compton Street, Soho, London, UK

I lost my phone the night of Friday 13th September. Google maps is locating it to the area of Cafe Boheme in Soho, London, so it either fell out of my pocket when I got into a taxi or I dropped it. It was continuing to ring on the 14th when I tried to find it. The make is "Oneplus 3", it is light gold and it has a black cover on the back. It looks similar to an iphone. There is a security pin so if it is found the person with it won't be able to access it to find an owner. (Clodagh, 15 Sep. 2019)
